To Whom It May Concern

Re: Fourwinds Construction Inc.

Since 2004 on various projects throughout the GTA, Fourwinds Construction Inc. has performed a wide variety of watermain and sewer (storm & sanitary) construction works functioning as a Subcontractor to Feramar Construction Limited. Feramar regards Fourwinds as one of our top subcontractors to work with. They have proven themselves to be a competent, responsible and reliable contractor when performing on projects for Feramar. Fourwinds has constructed their varying works in compliance with drawings and specifications and have been fully responsive to issues on site, with timely submission of, and timely response to administrative matters.

Some of the recent projects Fourwinds has completed for Feramar are as follows:

2006	Teston Road Reconstruction – storm works (York Region)
2006/09	James Snow South – storm works (Halton Region)
2007/09	Coleraine Reconstruction Ph1 – storm & sanitary works (Caledon)
2009/10	Hwy 400 & King Rd Interchange – storm works (MTO)
2009/10	Holland St W & 10 th Sdrd – storm & water works (Bradford)
2010	2 nd Line Reconstruction – cip headwall & culverts (New Tecumseth)
Current	Queensway Improvements – CPP watermain & storm (Peel Region)

We would have no hesitation in recommending Fourwinds for award of similar projects.

Yours Truly,

FERMAR PAVING LIMITED
